

Irwan Khoirul Faiz

Operations & Logistics Automation | Web Development Specialist

Palangka Raya, Central Kalimantan | 085849253623 | irwankhoirulfaiz@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Operations & Team Leadership in logistics, combined with full-stack web development to build practical solutions for real business needs. I build lightweight systems around real operational bottlenecks — from workforce monitoring and performance visibility to line-haul tracking and small-business POS. I work across React/Next.js frontends and Firebase/PostgreSQL backends, choosing the stack around the workflow.

CORE SKILLS

JavaScript • React • Next.js • HTML • CSS • Firebase • PostgreSQL • Google Apps Script • VS Code • Dashboard Building • Responsive Web Design • Warehouse Management Systems • Operational Strategy • Process Automation • Lean / Kaizen • Forecasting • 3PL • Data Analysis • Data-Driven Decision Making • Continuous Improvement • Risk & Efficiency • Team Leadership • People Mapping • Coaching & Mentoring • Recruiting

PROFESSIONAL EXPERIENCE

Web Development Specialist

Fastwork Technologies Indonesia · Freelance · Remote | Jun 2026 — Present

- Building custom web applications and dashboards for clients who need practical tools for real business workflows.
- Handling requirement mapping, interface design, frontend development, database integration, testing, and deployment as an independent developer.
- Developing systems such as wedding planner dashboards, digital cashier/POS applications, automated reporting tools, and real-time operational monitoring dashboards.
- Building with React and Next.js on the frontend, with Firebase and PostgreSQL for backend and application data; also using HTML, CSS, JavaScript, and Google Apps Script where they fit the workflow.
- Translating client needs into clear features, refining solutions through feedback, and delivering interfaces simple enough for day-to-day use.

Sortation Center Shift Lead

SPX Express · Palangka Raya | Jul 2024 — Present

- Managing daily sortation center operations (Linehaul, Inbound/Outbound, Return/RTS) and leading a high-volume shift of 3 Team Leaders and 60–70 Operators per shift, scaling to 80–90 during Mega Campaigns.
- Designing monthly shift schedules for TLs, Admins, and Operators; managing Daily Worker fulfillment and adjusting headcount based on workload/productivity to optimize labor costs.
- Ensuring SOP, 5S, and SLA compliance; optimizing sorting throughput during Golden Hours and evaluating daily EOS/EOD metrics.
- Designed and coded a custom real-time monitoring dashboard using JavaScript, HTML, and Google Apps Script to track operator rest hours, reducing administrative processing time and manpower operational loss time by 45%.
- Initiated and executed Parcel Dwell-Time Reduction; developed automated tracking systems to clear long-aging inventory (>2 days) and optimize outbound staging capacity.
- Acting as the primary internal problem solver for floor bottlenecks and building operational redundancy through Assistant Team Leader development.

Sortation Center Team Lead

SPX Express · Palangka Raya | Sep 2023 — Jul 2024

- Implemented daily operational SOPs and strategic people mapping to optimize sorting floor capacity against fluctuating parcel volumes.
- Supervised hourly inbound and outbound parcel flows to maintain processing speed and eliminate line bottlenecks.
- Tracked real-time Linehaul movements from origin to destination hubs, monitoring ATD (Actual Time of Departure) and ATA (Actual Time of Arrival).
- Handled daily operational support, team building, performance mentoring, and partial inbound sorting reports for management.

Staging Store Assistant

Anteraja · East Barito Regency | Sep 2021 — Dec 2022

- Supervised daily staging hub operations, enforcing operational SOPs to consistently achieve a 97%+ daily delivery and pickup SLA.
- Managed courier administration and engineered efficient delivery route assignments for the fleet to optimize daily drop rates.
- Monitored hub-to-staging workflows, pre-alerts, inventory handling, and sorting bottlenecks.
- Monitored high-risk processes including 3PL logistics, damage control, missroutes, high-value packages, and dangerous goods.

Sales Marketing

PT. Benelli Motor Indonesia · Palangka Raya | Jun 2023 — Aug 2023

- Conducted structured target market analysis and consumer canvassing around Palangka Raya to identify prospective sales leads.
- Executed social media branding initiatives and created content to expand dealership visibility and customer reach.
- Delivered consultative client communications and service excellence to build pipeline opportunities.

Courier

Satria/Anteraja · Central Kalimantan | Jan 2021 — Sep 2021

- Handled parcel pickups and final-mile deliveries under strict timelines to prevent parcel aging and SLA breaches.
- Maintained individual and team-supported daily delivery performance metrics above 97%.
- Assisted onboarding of new couriers and daily workers through route orientation and delivery logistics training.

SELECTED PROJECTS

SOC Control Tower

Internal real-time operations dashboard integrating 5 operational modules; built with JavaScript, HTML/CSS, Firebase Realtime Database, Firebase Auth, session-based access guards, and audit trail. Used daily by the Palangka Raya DC operations team, replacing manual tracking with centralized real-time visibility.

Es Teh Kito — POS Kasir

Lightweight real-time point-of-sale web app for a small beverage business. Built with JavaScript and Firebase Realtime Database, with multi-device synchronization and optional authentication. Delivered as a ready-to-use product on FastWork.

Rencana Nikah — Wedding Planner

Web-based planning dashboard consolidating wedding preparation into 9 modules across 3 phases, with private per-account planning space. Built as a single-page app and delivered as a ready-to-use product on FastWork.
